NAGA TEJASRI BHAVIRISETTY

B.TECH CSE STUDENT | FULL-STACK & AI/ML

CONTACT

tejasrib2008@gmail.com

Hyderabad, Telangana,India

EDUCATION

2025 - 2029

NIAT AT CHAITANYA DEMEED TO BE UNIVERSITY

- B.Tech in Computer Science and Engineering

2023 - 2025

OXFORD VIT JUNIOR COLLEGE

SKILLS

Programming Languages: Python, JavaScript, SQL

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, Next.js (Basic)

Backend: Node.js, Express.js, Flask, REST APIs

Database: PostgreSQL,MongoDB, SQLite

AI & ML: Prompt Engineering, Gemini API, RAG Fundamentals, AI Agents, Machine Learning Fundamentals

Tools: Git, GitHub, VS Code, Postman

Deployment: Vercel, Netlify, Render

Core Concepts: OOP, DBMS, Data Structures & Algorithms (Learning), Responsive Web Design

Soft Skills: Problem Solving, Critical Thinking, Communication, Teamwork, Time Management

LANGUAGES

- English
- Telugu

PROFILE

Second-year B.Tech CSE student building AI-powered full-stack applications with React, Node.js, Python, and the Gemini API. Hands-on experience with RAG, AI agents, and deployed web apps. Seeking internship opportunities in full-stack and AI/ML.

PROJECTS

Inventra AI – Smart Inventory Management Platform

Tech Stack: Next.js, React.js, TypeScript, PostgreSQL, Prisma ORM, Groq API

- Developed a full-stack AI-powered inventory management platform with secure authentication and real-time inventory analytics.
- Integrated AI-powered inventory recommendations, OCR-based invoice scanning, and barcode management to automate inventory operations.
- Built a responsive dashboard using Tailwind CSS with interactive charts and optimized PostgreSQL database operations using Prisma ORM.

CORE9 – Multi-Agent Crisis Intelligence Platform

Tech Stack: React.js, Vite, Node.js, Express.js, Supabase, Gemini API

- Developed a full-stack crisis management platform with authentication, incident management, task tracking, reports, analytics, notifications, and emergency contacts.
- Designed an eight-agent AI workflow (Vision, Situation Analysis, Decision, Planning, Resource Allocation, Communication, Monitoring, Report) where each agent builds on the previous agent's output.
- Integrated the Gemini API to process incident data into structured decisions and automated summary reports.

Event Feedback Analyzer

Tech Stack: React.js, Flask, Python, Gemini API

- Developed an AI-powered web application to analyze and summarize event feedback using the Gemini API.
- Built a React frontend integrated with a Flask backend for intelligent feedback processing and sentiment analysis.
- Automated feedback categorization to generate actionable insights for event organizers.

LuxeSpace Interiors – AI-Powered Interior Design Website

Tech Stack: React.js, Node.js, Express.js, Tailwind CSS, AI Chatbot

- Designed and developed a responsive interior design website with an integrated AI-powered chatbot.
- Implemented a modern, user-friendly interface with responsive layouts and optimized website performance.
- Deployed the application on Render for public access and seamless user experience.

ACHIEVEMENTS

- **Earned the Novice badge in the GRIT AI System Mastery track**
- **Participated in the Murf AI Hackathon and the Takeover Hackathon, building AI-powered applications**
- **Deployed multiple responsive web applications on Render, Vercel, and Netlify.**
- **Participated in the BRAVE Program, finding clients and proposing web-based solutions to grow their revenue**
