PROFILE

Second-year B.Tech CSE student building AI-powered full-stack applications with React, Node.js, Python, and LLM APIs (Gemini, Groq). Built a multi-agent AI workflow, an OCR-enabled inventory platform, and several deployed web apps. Comfortable with AI-assisted development and prompt engineering. Seeking an AI / full-stack internship.

EDUCATION

NIAT at Chaitanya Deemed to be University B.Tech in Computer Science and Engineering **(CGPA: 10)** — 2025 – 2029

Oxford VIT Junior College (98%) — 2023 – 2025

Sai Vikas HighSchool (94.83%) — 2022– 2023

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, SQL
Frontend	HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, Next.js (Basic)
Backend	Node.js, Express.js, Flask, REST APIs, Prisma ORM
Databases	PostgreSQL(Supabase) , MongoDB, SQLite
AI & ML	Prompt Engineering, LLM APIs (Gemini, Groq), AI Agents, Multi-Agent Workflows, RAG (fundamentals), AI-assisted development (Antigravity, Claude, ChatGPT, Gemini)
Tools	Git, GitHub, VS Code, Postman
Deployment	Vercel, Netlify, Render
Core Concepts	OOP, DBMS, Data Structures & Algorithms (Learning), Responsive Web Design

PROJECTS

Inventra AI–Smart Inventory Management Platform (Team Project)

TechStack: Next.js,React.js,TypeScript, PostgreSQL, PrismaORM, Groq API

- Contributed to a full-stack, AI-powered inventory management platform (Next.js, PostgreSQL) with secure authentication and real-time analytics.
- Owned the Automation & Smart Features module: expiry checking, low-stock detection, and automated email alerts and notifications to reduce manual inventory monitoring.
- Built OCR invoice scanning (Tesseract.js) and live camera barcode scanning (ZXing), including image preprocessing to improve scan accuracy.
- Implemented frontend-backend API integration and used the Groq API for AI-powered inventory recommendations. Built an interactive dashboard with React and Tailwind CSS.

CORE9 – Multi-Agent Crisis Intelligence Platform

Tech Stack: React.js, Vite, Node.js, Express.js, Supabase, Gemini API

- Designed an 8-agent Gemini workflow (Vision, Situation Analysis, Decision, Planning, Resource Allocation, Communication, Monitoring, Report) where each agent builds on the previous agent's output.
- Built the full-stack platform with authentication, incident management, task tracking, analytics and emergency contacts.
- Turned raw incident data into structured decisions and automated summary reports.

Event Feedback Analyzer

Tech Stack: React.js, Flask, Python, Cohere API

- Built a React and Flask app that uses the Cohere API to categorize feedback and run sentiment analysis. Generated summaries and
- actionable insights for event organizers.

LuxeSpace Interiors – AI-Powered Interior Design Website

Tech Stack: React.js, Node.js, Express.js, Tailwind CSS, AI Chatbot

- Designed and built a responsive interior design website with an integrated AI chatbot. Deployed on Vercel for public access.
  Live link : https://luxespace-interiors-eta.vercel.app/ , Github: https://github.com/NagaTejaSriCore/luxespace-interiors

ACHIEVEMENTS

- Earned the Novice badge in the GRIT AI System Mastery track.
- Built AI-powered applications at the Murf AI Hackathon, Build to Ship Hackathon and the Takeover Hackathon.
- Deployed multiple responsive web apps on Render, Vercel and Netlify.
- BRAVE Program: identified prospective clients and proposed web-based solutions to grow their revenue.
